Monsoon : Call 112 at 24x7

The State Police Chief Loknath Behera has stated that people at flood affected areas may call 112 operating at the State Police Headquarters for any kind of assistance.

The State Emergency Response Centre working round the clock in the Police Headquarters will receive such calls. The centre could easily locate the location of the caller. Since this system is linked to all control room vehicles, the concerned control room vehicle will reach the area of distress call in quick time. By this rescuers can be easily sent to the flood affected areas. SMS facility has also been activated in this number. Anybody across the State can request help to this number.

Public can use 112 India Mobile Application to call the Emergency Response Centre. If the panic button in the app is pressed, then State Control Room will contact the same number and provide the needed help.
